

User needs

Agreed Goals

We have revised project description that has been agreed to by all stakeholders.

Environment

System's business environment

This project is non-commercial, free for any user to use. But it is optimized for education environment (like schools, universities, academies, research institutes...)

System's physical environment

Heroku is a cloud application platform

Its service lets app developers spend 100% of their time on their application code, not managing servers

Stakeholders

All

All stakeholders share the following key needs:

- Security against abuses by other site visitors
- Convenient access to the site any time over the Internet
